

Pantrac – Lighting effects for walls

Simple and efficient wallwashing for museums and business premises.

Pantrac exceeds the demands of the ultimate challenge in lighting design: perfect wallwashing. The system is designed to achieve superb uniform illumination of walls, product shelving or exhibits with total visual comfort. Innovative photometrics optimize its efficiency and, as a result, reduce the number of luminaires required, as these can be spaced further apart.

With its archetypal cubic design, the luminaire integrates as effort-

lessly with modern rooms as with historic architecture. A very wide dimming control range of 1% to 100% supports aesthetic and conservation aspects of artwork protection and gallery appearance.

Pantrac for 2-circuit track

Structure and characteristics

The features described here are typical of products in this range. Special versions may offer additional or varying features. A comprehensive description of the features of individual products can be found on our website.

1 ERCO Spherolit lens

- Light distribution: wallwash

2 ERCO LED-module

- High-power LEDs: warm white (2700K or 3000K) or neutral white (3500K or 4000K)
- Collimating lens made of optical polymer

3 Front cover

- Polymer, black lacquered

4 Housing

- White (RAL9002), black or silver
- Cast aluminum, powder-coated
- Rotatable through 360° on adapter

5 Control gear

- Trailing edge dimmable+On-board Dim
- Dimming with external dimmers (trailing edge) possible and rotary control for brightness control on the luminaire

6 ERCO turning adapter for 2-circuit track

Variants on request

- Housing: 10,000 further colors
- Please contact your ERCO consultant.

Pantrac for 2-circuit track

Outstanding uniformity
Pantrac provides uniform vertical lighting to perfection - whether in prestigious entrance areas, in offices or in museums.

Simple installation
Pantrac creates perfect light for wallwashing without additional pivoting.

Large luminaire spacing
The high-efficiency Pantrac lighting technology enables luminaire spacing of up to one and a half times the distance to the wall.

Special characteristics

	Outstanding uniformity
	Easy installation
	Wide luminaire spacing with wallwashing

ERCO high-power LEDs

Efficient Spherolit technology

Different light colors

Excellent thermal management

EMC-optimized

Various housing colors

Various construction sizes

Trailing edge dimmable + On-board Dim

Pantrac for 2-circuit track – Luminaire arrangement

Lens wallwashers
Wallwash

Wallwashing

For uniform vertical illuminance, the distance (a) of Pantrac lens wallwashers from the wall should be around one third of the room height (h). The luminaire head has been adjusted precisely for optimum wallwashing.

Arrangement: $a = 1/3 \times h$

For good longitudinal uniformity, the spacing (d) of Pantrac lens wallwashers may be up to 1.5 times the offset from the wall (a).

Arrangement: $d \leq 1.5 \times a$

The optimal wall offset and luminaire spacing for each product are indicated in the wallwasher tables in the catalogue and the product data sheets.

Die Fall der Menschheit
Die Fall der Menschheit ist eine Serie von vier Wandteppichen, die von Pieter Bruegel dem Jüngeren im 16. Jahrhundert geschaffen wurden. Die Serie zeigt die biblische Geschichte der Erschöpfung der Menschheit durch die Sünden der Vorfahren. Die vier Wandteppiche sind: 1. Die Erschöpfung der Menschheit, 2. Die Erschöpfung der Menschheit, 3. Die Erschöpfung der Menschheit, 4. Die Erschöpfung der Menschheit.
