

Light Board – An established archetype

Light Board is a strong partner for virtually any lighting task
Characteristic for Light Board is its striking design: the flat housing with sophisticated thermal management ensures a long service life. The innovative lighting technology with high visual comfort and easy adjustability is the ideal solution for lighting tasks in sales spaces and museums. Light Board offers different luminous flux packages suitable for accent lighting over long distances, even in high rooms, and for illuminating walls.

Light Board for track 220-240V

Structure and characteristics

The features described here are typical of products in this range. Special versions may offer additional or varying features. A comprehensive description of the features of individual products can be found on our website.

1 ERCO Spherolit lens

- Light distributions: narrow spot, spot, flood, wide flood, extra wide flood, oval flood or wallwash
- Oval flood adjustable through 90°

2 ERCO LED-module

- High-power LEDs: warm white (2700K or 3000K) or neutral white (3500K or 4000K)
- Collimating lens made of optical polymer

3 Housing and bracket

- White (RAL9002), black or silver
- Cast aluminium, powder-coated
- 0°-90° tilt
- Bracket on adapter rotatable through 360°
- Internal wiring
- Front cover: polymer, black

4 Control gear

- Switchable, phase dimmable+On-board Dim, DALI dimmable or Casambi Bluetooth
- Phase dimmable + On-board Dim version: Dimming with external dimmers (trailing edge) possible and rotary control for brightness control on the luminaire

5 ERCO 3-circuit adapter or ERCO DALI adapter

Variants on request

- Housing: 10,000 further colours
- Please contact your ERCO consultant.

Light Board for track 220-240V

Large lumen packages for very high illuminances

The attention of the viewer can be focused via contrasting accents. ERCO has high-performance luminaires with large lumen packages in its range for this purpose.

Small luminaire dimensions

Small luminaires are discreet and place the focus on the light itself. Compact luminaire dimensions are particularly advantageous with small rooms.

Special characteristics

Large lumen packages for very high illuminances

Small luminaire dimensions

ERCO high-power LEDs

Efficient Spherolit technology

Different light distributions

Different light colours

Excellent thermal management

EMC-optimised

Various housing colours

Various construction sizes

Pivotable through 90°

Accessory for maximum visual comfort

Switchable

Phase dimmable + On-board Dim

DALI dimmable

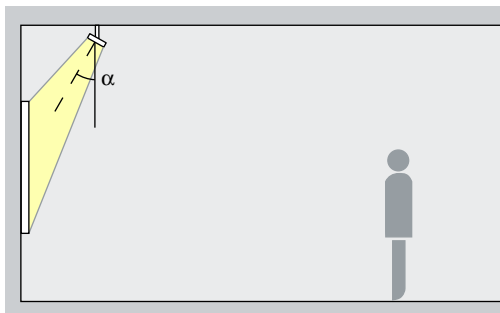

Casambi Bluetooth

Light Board for track 220-240V – Luminaire arrangement

Spotlights

Narrow spot, Spot, Flood

Accentuation

Light Board spotlights accentuate artwork, products and architectural details effectively. The ideal angle of tilt (α) for this is around 30° . The object is modelled without distorting the effect as a result of excessive shadowing. It also prevents shadows cast by the observer.

Arrangement: $\alpha = 30^\circ$

Floodlights

Wide flood, Extra wide flood, Oval flood

Washlighting

The ideal angle of tilt (α) for floodlighting objects with a long, square shape, e.g. pictures, sculptures or merchandise displays, is around 30° .

Arrangement: $\alpha = 30^\circ$

Lens wallwashers

Wallwash

Wallwashing

For uniform vertical illuminance, the distance (a) of Light Board lens wallwashers from the wall should be around one third of the room height (h). This results in an angle of tilt (α) of approx. 35° .

Arrangement: $a = 1/3 \times h$ or $\alpha = 35^\circ$

For good longitudinal uniformity, the spacing (d) of Light Board lens wallwashers may be up to 1.2 times the offset from the wall (a).

Arrangement: $d \leq 1.2 \times a$

The optimal wall offset and luminaire spacing for each product are indicated in the wallwasher tables in the catalogue and the product data sheets.
